

M8034

Software Project Management

Who am I?

Lo Chi Wing, Peter

- Email: Peter@Peter-Lo.com

Syllabus

- The Product and Process
- Project Management and Concepts
- Project Scheduling and Tracking
- Software Process and Project Matrices
- Software Quality Assurance
- Software Testing/Maintenance

Message from OBU Professor (Dr. Rosemary Phillimore)

- Students for M8034 are expected to spend approximately **100 hours** working on this module. Around 30 hours will be spent in lectures; this means that another 70 hours should be spent on research and documentation for assignments and examination. This work is unsupervised with students making use of a variety of learning materials such as The Internet, the Reading list, Worked Case studies, Independent Study materials. **50% of the examination questions are based on the lectures and the rest of the questions are application-based questions.**

Assessment

- **Assessment**

Assignment	30%
Examination	70%

Total: 100%

- **Study Approach**

Lecture	25 hours
Self study (including Coursework)	75 hours

Total: 100 hours

Do and Don't

- **Do not turn on your mobile**, pager or any form of alarm that will distract your fellow classmates.
- **Do not make any unnecessary noise** unless you have just found out you won a Mark Six!
- **Do turn up on time** to avoid unnecessary distraction.
- Do exchange ideas and discussions on assignments but **NOT copying**. You are here to LEARN not copy. You will be severely dealt with if caught cheating under the university disciplinary action.
- **Do enjoy and learn from the course.**
